# HOW TO INSTALL AFTER EFFECTS SCRIPTS

Installation

There are multiple alternatives for installing a script. Depending on the installation folder, the script will be accessible from different commands. Choose the one you prefer.

You can place the script either

1. in the *ScriptUI Panels* folder if you want it to be displayed as a dockable panel. This folder is located at *path-to-ae/Scripts/ScriptsUI Panels*. The script will appear in the Window menu.

2. or in the *Scripts* folder to make it accessible from the File > Scripts menu.

3. or anywhere in your machine, and you can execute it using File > Scripts > Run Script File...
